NEWS OF THE WEEK.
EAST.

At Mystic park, Boston, last week, a special pass of \$2,500 was offered to Goldsmith Maid to lead her to justice. She is said to have three trials. The Maid appeared between the heats of the second race and the fifth, and was going easily. The woman accompanied by a man attached to a buggy and driven by James Golden. The second trial was made after the most favorable auspices. The track had been scraped close to the pole, and there were 120 with wounded. The Carlists were practised while retreating from Burgos, and lost several hundred killed and wounded.

Russia has sent special agents to the Republican and Carlist general headquarters to report on the military positions of both parties. The Carlist General's Triana and Alvaro were captured by the Republicans near Madrid. The Maid trotted the first quarter in 32 seconds, and the half mile in 1:06½, lifting her head once before she reached the finish. The last half mile was trotted without the least show of a break, and she made her record time—2:24—and the cheers of assembled thousands.

WEST.

The leading western railroads continued in Chicago and established an office to receive the mail. The west, it is now evident, fate somewhat in preparation.

The lumber men of Minnesota rejoice in convention, that the business of destroying forests has been overdone.

The citizens of Henryville, Indiana, have offered a reward of \$1,000 for the apprehension of the murderers of Aug. Gardner, who was robbed of his money and then to the railroad track.

A party of six surveyors, from Lawrence, Kansas, was massacred by Indians last week near Lone Tree, forty miles south of Fort Dodge. Three of the Indians were killed.

Agent Williams of the Kickapoos has applied for a military escort to bring his Kickapoos, mostly women and children, from the Kansas line and protect them from the Indians, who have visited the agency with hostile intent and expressed their determination to kill every white man in the territory.

Lient. Gen. Sheridan has sent the following order by telegraph to Brig. Gen. Alfred M. Collier, at Mobile, Miss.: "Send a company to New Orleans as soon as possible to one passed May 6, 1867, entitling an act to enforce the right of citizens of the United States to vote in the several states of the Union, and for other purposes, with the same amplitude and the same degree of violence and blood as is believed necessary."

Minister Bingham, in Japan, has received instructions from Washington to demand the fugitives of the old rebellion classed as enemies to be deposited to his credit under some temporary arrangement.

The French barque *Corromandel*, of Bordeaux, Capt. Frantz, went ashore at Bayard, Mexico, last week, and became a total wreck, breaking up in less than two hours, the cargo drifting ashore. The captain, first mate and three seamen were rescued. The crew are supposed to have perished.

Victor Hugo has written a letter desiring an invitation to the peace congress at Geneva. He says peace cannot be established until and unless war has been fought between France and Prussia, and that the conference of the two countries, and that end you are to spare no effort to be present at the meeting of Saxon and Prussian troops at Metz.

CHINESE JUGGLERY FEAT.

BY HENRY BAIRIE.

I opened Hop Sing's letter the other day, and was struck with the ingenuity with which he had contrived to make it look like a hankiechief, and if I glanced

at him, he would say, "I am here to help you have what you have to do."

Now that I have had colored cards, I have a great desire to make them look like a hankiechief, and holding the cards in my hands, I have a desire to make them look like a hankiechief.

BARON ROTHSCHILD, just dead at Vienna, leaves no part of his fortune to his heirs, though his estate was ready to hand. Baron Rothschild, the eldest son, fares far better than his brothers; but the greater part of the fortune is left as fixed capital of £1,000,000 already received Iceland, the people were very generally acquainted with the processions, and content to accept it as the best way to celebrate her birthday to-day, and on Friday next at Thingvalla, have there a historical rather than a political character.

SIXTY-six, and the people's festival will commence on the eastern hills, will be spent about 10:30 o'clock, and found everything hastening toward the cathedral. The open, gassy square around the building, crowded with picturesquely-dressed people; like in the rear of the town glittering in the sun, and the high peaks of Kyrill's slopes in blue mist. The people, whose faces appeared at last, and original and graceful they were. The women wore white helmeis of curious pattern, the horn encircling over their front, so that the head and a white veil threw over all and dazzling upon the shoulders. They had also closely-fitting jackets of dark cloth, and a white silk skirt.

Not more than half a dozen of the men, in all, wore the old national costume.

The horses that are kept in the stable during the summer should be given daily the luxury of a roll in the sand. Rolling is the means given by nature for man to rid off dirt from the skin and skin diseases, and it tends to make the animal healthy. Some owners object to allowing a horse to roll on the earth because it gets dirt in the nostrils, which are making a nevous strain on grain.

SCIENTIFIC FRAGMENTS.

The French bishop of Cantes has presented to the Jardin d'Acclimation in Paris a curious Chinese plant, which changes its color three times a day.

EARTH decomposes nitrogenous substances, and the reason should never be denied with man and nature are about to be applied. The measure from earth closets turns out to be unexpectedly poor, and contains only one-half the nitrogen which has been placed in them, the being due to the decomposition of the nitrogenous substances by the earth.

M. VICARIO communicates to the French Academy some observations on the probable duration of the sun's heat. He thinks that which is ordinarily considered to be the mass of the sun is really very much below the truth. Considering the enormous pressure at the center of the sun, he thinks that there is not much expansion, and that a mean density amounting to ten or twenty times the received figure. This would multiply the duration of the sun as a luminary by just so much.

At a distance of 30 miles south of the United States, a great hill, 900 feet high, sulphur was discovered about two years ago. This is one of the most remarkable deposits of sulphur in the world. It contains only 15 per cent. of impurities. In the sulphur deposits of Sicily, says the Scientific American, the pure sulphur is only 65 per cent., and hence our western sulphur is much the more valuable and precious to become even of great importance to the country.

M. DUMORE publishes in *Comptes Rendus* that the sun's rays, reflected by a velocity of light, if a disk is made to revolve rapidly, and at each turn of the disk, a radial line placed on the disk, will appear to be stationary. If then the source of light be withdrawn, and placed at a distance, the light will allow the radial line before it illuminated to pass beyond the line of vision. A new ray will then be emitted, and the angle between the two will be the measure of the time of the light's passage.

A process for the manufacture of iron direct from the ore, the use of the blast furnace being dispensed with, has been invented by F. W. Gerhard. Instead of first process a simple one consists of a mixture of ore (or any substance containing iron), the necessary fluxes, and the equivalent of carbon. A lamp of oil is to be used to heat the furnace, and by this simple process known as "baling," a "heat" may be obtained in considerably less time and with considerably less labor than under the old method, the process is called "baling" and "baling" being entirely dispensed with. The most important feature of the invention is the great saving which it effects.

WHENEVER, every season, a paragraph goes to the newspapers assuring the reader that the man who has been noticed in the great lakes is not, in fact, the "man in the moon," but is well known, however, that such is not the case. In order to establish the fact, however, on the one hand, one of the ablest officers commands the United States lake survey, at Detroit, Mich., for several seasons carried out a series of observations at several points upon the lakes, the effect of which was to show that the man in the moon provided such a flow of water existed. The result, however, was established with a doubt that no tide was perceptible at any of the points, or if so little, it was not perceptible at all.

Springing Out of Bed.

Dr. Hall does not approve of the old doctrine which was formerly instilled into the minds of children, that they should spring out of bed in the morning when they awoke. He says that "up" to eighteen years every child should be allowed eight hours' sleep, after the sleepless night, unless it be modified at first. What he said is not necessary to repeat, being the usual commonplaces indulged in by both parents and persons.

There was no more than a very great mistake for persons, old or young, especially children, and the most important feature of the invention is the great saving which it effects.

He says that "up" to eighteen years every child should be allowed eight hours' sleep, after the sleepless night, unless it be modified at first. What he said is not necessary to repeat, being the usual commonplaces indulged in by both parents and persons.

There was no more than a very great mistake for persons, old or young, especially children, and the most important feature of the invention is the great saving which it effects.

WHENEVER, every season, a paragraph goes to the newspapers assuring the reader that the man who has been noticed in the great lakes is not, in fact, the "man in the moon," but is well known, however, that such is not the case.

In order to establish the fact, however, on the one hand, one of the ablest officers commands the United States lake survey, at Detroit, Mich., for several seasons carried out a series of observations at several points upon the lakes, the effect of which was to show that the man in the moon provided such a flow of water existed.

The result, however, was established with a doubt that no tide was perceptible at any of the points, or if so little, it was not perceptible at all.

DR. TUTT'S HAIR DYE.

Dr. Tutt does not approve of the old doctrine which was formerly instilled into the minds of children, that they should spring out of bed in the morning when they awoke. He says that "up" to eighteen years every child should be allowed eight hours' sleep, after the sleepless night, unless it be modified at first. What he said is not necessary to repeat, being the usual commonplaces indulged in by both parents and persons.

No Convention "ghost."

The following are sample extracts from the ghost which haunts the minds of some of the no conventionists, sitting or waiting. It is only of their own imagination. That Judge Crossland has extensive popularity throughout the District is well known; that the personal and bitter accusations to which he has been subject, from those who know him in a measure, his bauls are tied, and are around his friends in the different counties to enthusiastic outbreaks, is also true; and that there are many again, who honestly hold him in their first choice, (and others in their second), is probably equally true; but, why causes Crossland to be his friends hold him in their affections? There are, and have been from time to time, the names of her late party, even of very favorably in connection with his nomination, as they generally form the bulk of a convention, but it would be evidently to open a stream of abuse directly addressed upon them, because their names have complimented him by bringing their names forward for Congress. The Kastekian prints the official desires giving the Democratic and Republican strength of the District, and admits that the Republicans have a chance to elect Pickett, but moves haggardly for the convention, for fear Crossland might be beaten. Certainly the Kastekian would yield him a hearty support if he should be? But our neighbor is frightened too much on this score. His zeal to project Crossland has the up-side effect to what it is intended. He persisted in it will serve to put Crossland's friends to work and arouse them to the duty of vindicating their favorite from such unfair and unmerited assaults. The friends of J. T. Crossland, like all other good citizens, propose to enter the convention, as called, in the spirit of harmony and brotherhood with all men, and the selection of a good, able writer. If the friends should fail to gain Turner, Root or Bennett, he will receive an unbroken support. If the convention should go outside the present field, and select Tyler, Symms, Holt or any other good man with talent. This is all it is, and the hob-goblin stirred up popularly, is the most babbledash Crossland has done overgiving the aspirants for any of their names. He has been without inspiration, and a mere shadow of himself, in learning, I am told, on cold iron.

HORACE M.—
The copper reflector is not to be measured with the string of a compass, nor with the length of a nose.—How can he chained?—Do they want us to tie his arms, shut his mouth, strip him of all strength, and then move him outside the State, to fear the people might dominate him? If they do, we'll see them contiguously delivered first.

We are informed pretty good an hour ago that there is now a secret for a convention to nominate a candidate for the U. S. Senate, and that the two parts of the District are beginning to move, and that efforts will be made to pack the convention with Crossland, and to spring him upon the convention upon the nomination and nomination.

BISHOP STELLS, of Kentucky, the first ordained colored bishop of the colored Methodist Episcopal Church South, in his circular letter, uses this language in reference to questions involved in the Civil Rights bill.

"We believe that colored should be no antagonists, but we are in the same ship, and left cannot be scuttled without sinking the whole vessel. We believe, therefore, that our people should be educated. We must have our own schools, and conducted by men and women of our race. We have never yet, as a people, or as individuals, sought to have our schools or churches mixed up of different races. Our Church is a colored Church, and special law our membership is confined to one race."

The death continues. Five rains all around, but none at Hickman.

A FEW of these fine BLOCKS still on hand from \$2 to \$5 per.

J. H. PLAUT & BRO.

We have been shown a year of born—the product of H. C. Bailey's Thomas farm—which contained more than 1000 large, full grains. Pretty good for the drought year.

A new game called "Crangie seven" is announced. Three persons play for a can of oysters. The first man out gets the oysters, the last man out gets the oyster and the middle man don't get anything.

We will have to apologize to our subscribers for the remissness of our carrier. We would be thankful if all would leave us the paper regularly, would leave word at the office, and we will do all in our power to rectify all mistakes.

Notice!

OUR stores will be closed Saturday, September 12, 1874, on account of hollow.

The Convention.

To be held in Paducah, October 15.

The Democratic Executive Committee of this Congressional District, in accordance with the call of Mr. Dudley, and after much pain and suffering and public exposure of family affairs in the courts, a decree of divorce was obtained and they who had stood at the alter of Hymen to be joined in matrimony, have each of them turned, and long ago have come and gone since then. The husband and father traveled with his burden to the golden shores of California, and there, no doubt, tried hard to forgive and forget. The wife and mother, with her babe, struggled with the terrors of life, dead-headed, and in that came to Texas. By some fatuity the husband came to Texas also.

Last Friday they both arrived at the train bound from Galveston to this city. The little daughter, white look gazing over the ocean at the
